Our 5 steps to SD-WAN success

We want to help you demystify Software Defined WAN, so that you can understand its potential. Our five-step approach is designed to show you the ins-and-outs of Vodafone SD-WAN and why it could be the best solution for your business.

STEP 1: EXPLORE SD-WAN
Innovation Workshop

What's involved

An in-depth discovery session led by our SD-WAN experts, where you'll see interactive presentations, innovative live demos and guided discussions.

What you'll get

Find out how SD-WAN works, what it can do to improve overall operational agility, responsiveness and insights; to support your long-term business goals and solve your immediate networking issues.

STEP 2: ASSESS SD-WAN
Readiness Assessment

What's involved

A one-to-one consultation with a Vodafone SD-WAN specialist to identify your IT and business priorities and find out how SD-WAN can work for you.

What you'll get

A clear roadmap for how and when you should deploy SD-WAN, based on your business objectives, digital and technical strategy and existing infrastructure.

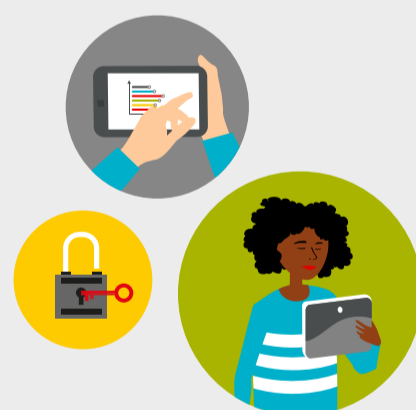

STEP 3: EVALUATE SD-WAN*
Demo

What's involved

A personalised demonstration allowing you to identify the SD-WAN capabilities and functionality your business and team needs while incurring zero operational risk or disruption.

What you'll get

See SD-WAN in action and get reassurance that it can deliver the right results for your business needs. You'll be able to create a compelling business case with quantified benefits, building confidence and buy-in ahead of wider deployment.

*Terms and conditions apply

STEP 4: PROVE SD-WAN
Proof of Concept

What's involved

A proof of concept or limited pilot deployment to demonstrate SD-WAN in action.

What you'll get

You'll get firsthand experience of how SD-WAN performs in your own day-to-day network environment, delivers against your requirements and addresses specific pain points.

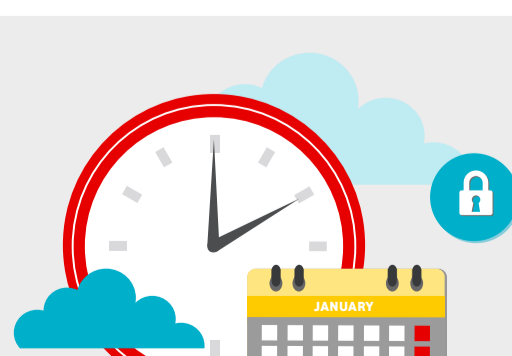

STEP 5: DEPLOY SD-WAN
Deployment

What's involved

All the local, national and international support you need to go live wherever you are, whatever your ambitions.

What you'll get

Deploy SD-WAN at a pace and scale that suits your business, and in a way that prioritises security, quality of service, and specific business requirements.
