

Your digital ambitions

Our SD-WAN Manifesto

The future is exciting.
Ready?

Introducing Vodafone Software-Defined WAN (SD-WAN).

Vodafone SD-WAN puts you in control by giving you complete visibility over your network. It creates an agile and flexible network with the ability to support a truly digital workplace. Support smarter working across your business, to boost your team's productivity.

That's not all. With Vodafone SD-WAN you can leverage the power of an intelligent network and Ireland's best mobile network. So, that means you can give your team the tools they need to stay connected and get the job done, whenever and wherever they are.

Vodafone SD-WAN gives you can rapid access to cloud applications and services, and just as importantly, it's a secure and resilient solution that is ready for anything. So you can focus on what matters to your business and innovate with confidence.

And as Ireland's leading total communications provider, we offer a complete end-to-end service, backed by a global network, that you can rely on.

So, whatever your digital ambitions are, whatever your future ambitions are, be ready for success with Vodafone SD-WAN.

Manage your network, your way

It gives you more choice over how you control your network.

Make changes quicker.

Prioritise bandwidth to your critical apps, when you need to.

Seamless and worry-free setup

We'll help you move in stages.

At a pace that suits you.

That means no downtime or disruption to your network. So it's business-as-usual.

All with End-to-End service management, both physical and overlay. Let us worry about the hard stuff, so you don't have to.

Redefine your network economics

Radically simpler network management.

Cost-effective connectivity and equipment. Supports multiple functions from a single box.

Choose from a wide range of network transport options to suit your business needs.

Minimise everyday pain points and unlock the best potential from your network.

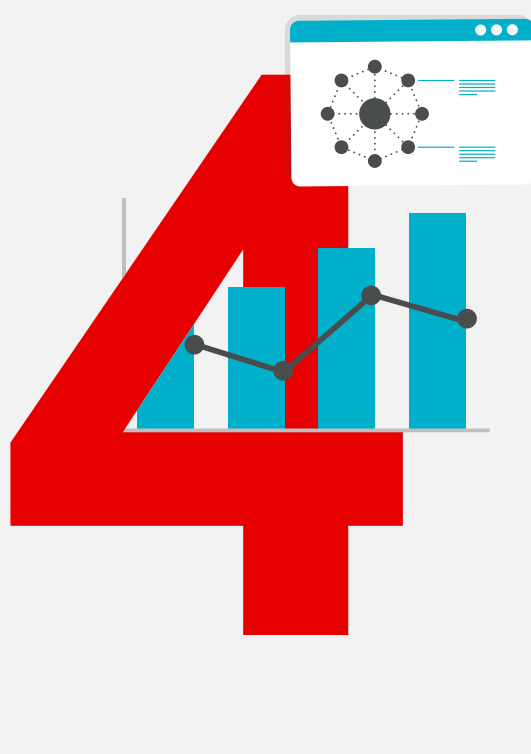

Know what's happening across your network

Built-in visibility gives you a complete view of your network. So you're always in-the-know.

Helping you avoid bottlenecks...

Ring-fence bandwidth for critical apps...

Make network changes as you need to. To make better business decisions, faster.

Automate & integrate

Rapidly deploy and manage networks in powerful new ways with the built-in API library.

Solutions and support you can rely on.

Achieve your digital ambitions.

Deploy at speed

Greater transparency, reporting and insights will enable you to grow and scale with confidence.

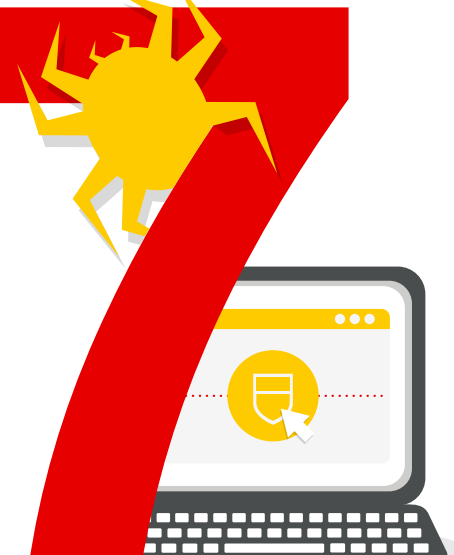

Launch new applications and services, when it suits you.

All made possible by our fast and agile managed service.

The software does all the hard work for you.

Stay one step ahead

Responsive, resistant, ready. Stay protected, keep performing.

Updating security rules has never been easier.

Just a few clicks of a button and...

Policies are updated across your whole network. In real time.

Your business Wi-Fi needs met

Support a flexible workforce.

Provide Wi-Fi to all your sites as part of your SD-WAN deployment.

Ensure its business-as-usual as you transition to our latest network technology.
